APITAL d.o.o. is a Croatian manufacturing company specializing in the **design and production of stainless-steel machinery and complete industrial solutions**.

Our Production Program

We manufacture a wide range of machinery, including:

- Food processing machinery, with a strong focus on fruit processing
- Packaging and filling machines for various types of products
- Beekeeping machinery and custom constructions
- Auxiliary and custom-made equipment

Complete Processing & Packaging Solutions

In addition to individual machines, we deliver fully integrated production lines, such as:

- Juice production lines
- Filling lines for juice, honey, and jams
- Honey extraction lines
- Automatic beeswax foundation machines

Our diverse product portfolio enables us to equip complete production facilities, from small-scale operations to industrial plants.

Engineering Expertise & Quality

Our manufacturing process is supported by a multidisciplinary team of mechanical, electrical, and IT engineers, ensuring seamless integration, technical excellence, and the ability to deliver even the most complex and demanding systems.

Our commitment to high quality, reliability, and sustainable manufacturing is confirmed by our ISO 9001 and ISO 14001 certifications.

Why choose APITAL?

- High performance. Sensible cost.
- Big enough to build complex machines. Small enough to listen and adapt.
- Designed for fast cleaning and easy maintenance.
- Simplicity is reliability. Fewer parts mean fewer problems.
- Designed to minimize footprint — because production space is a valuable resource.

PurePasteur 3 - The Jar Pasteurizer

enables precise and efficient pasteurization thanks to digital temperature control, which ensures optimal pasteurization conditions. This batch pasteurizer features a single jacket and three baskets measuring 49 × 34 × 34 cm.

The dimensions of the unit shown in the photo are 125 × 65 × 92 cm, but they can be customized according to the customer's specific requirements, making it a flexible solution for various production capacities.

- The jar pasteurizer with digital temperature control enables precise and efficient pasteurization under optimal conditions for the safe preservation of juices and liquid products.
- An integrated basket system allows simultaneous processing of multiple jars in a single cycle, increasing productivity.
- Customizable machine dimensions allow configuration according to user requirements and production capacity.
- Simple operation with digital temperature adjustment ensures intuitive and reliable use.

- High-quality stainless-steel construction with a fine surface finish ensures long service life and easy sanitary cleaning.

Technical description:

- Material: Stainless steel AISI 304
- Machine dimensions: 125 × 65 × 92 cm (or according to customer requirements)
- Basket dimensions: 49 × 34 × 34 cm (or according to customer requirements)
- Electric heater power: 2 × 6 kW
- Power supply: 400 V
- Digital temperature control
- Single jacket design
- Option to install a probe for measuring the temperature inside the jar during the pasteurization process

Utility requirements:

- Electrical supply: CEE industrial socket, 16 A, 3-phase

Delivery Terms: Ex works (pickup at our facility in Vrbovec) or delivery by agreement

Typical lead time: 6 – 8 weeks from order confirmation

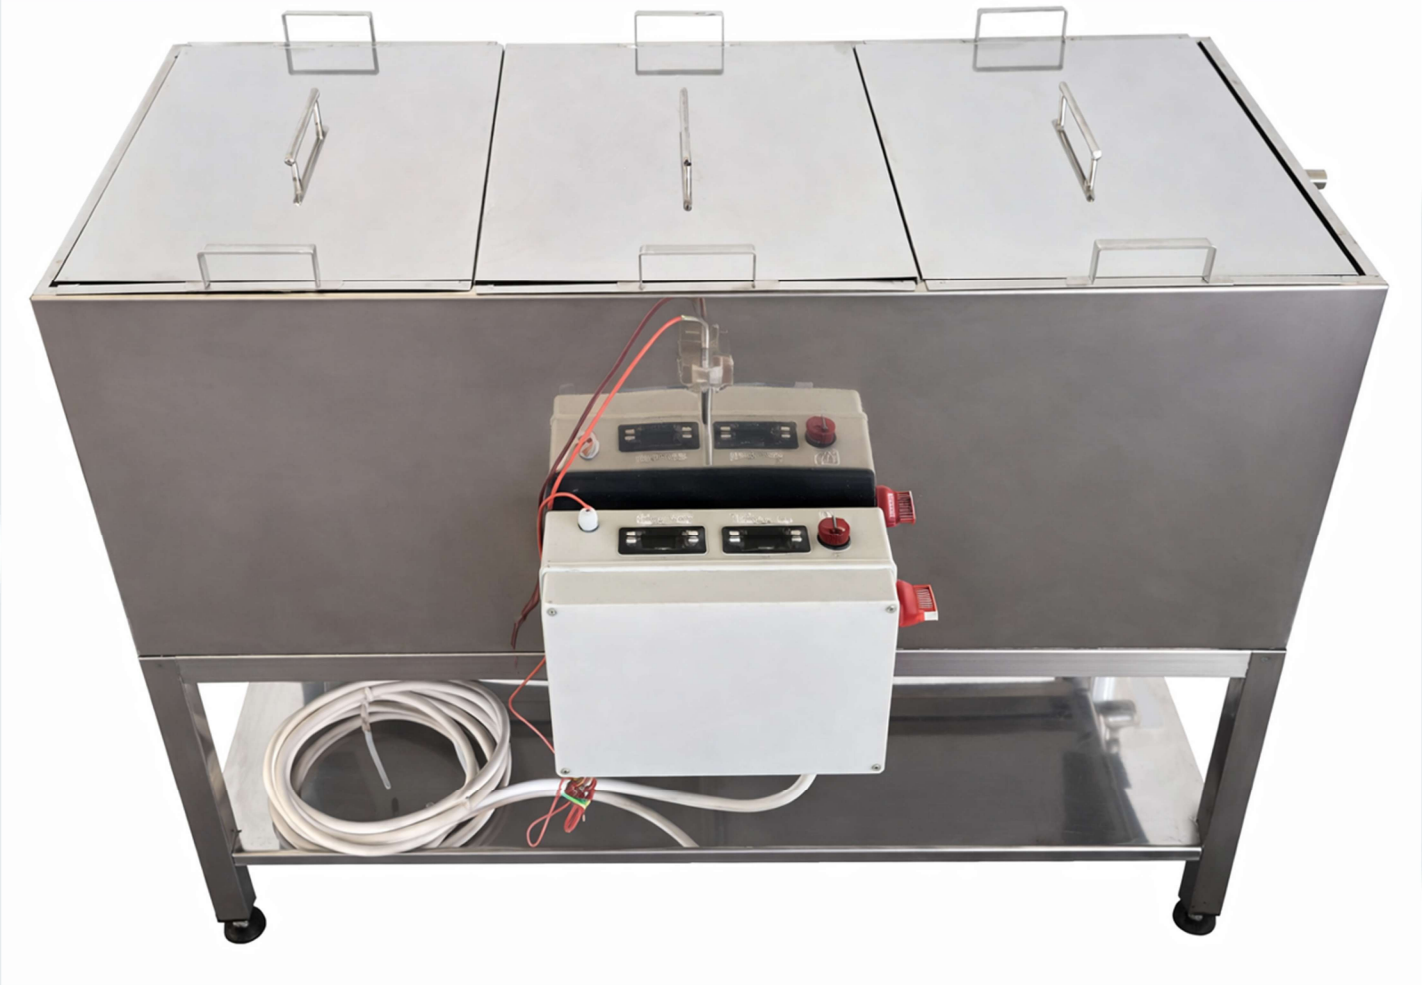

Payment Terms: 50% in advance, remaining amount before delivery

Warranty period: 2 years

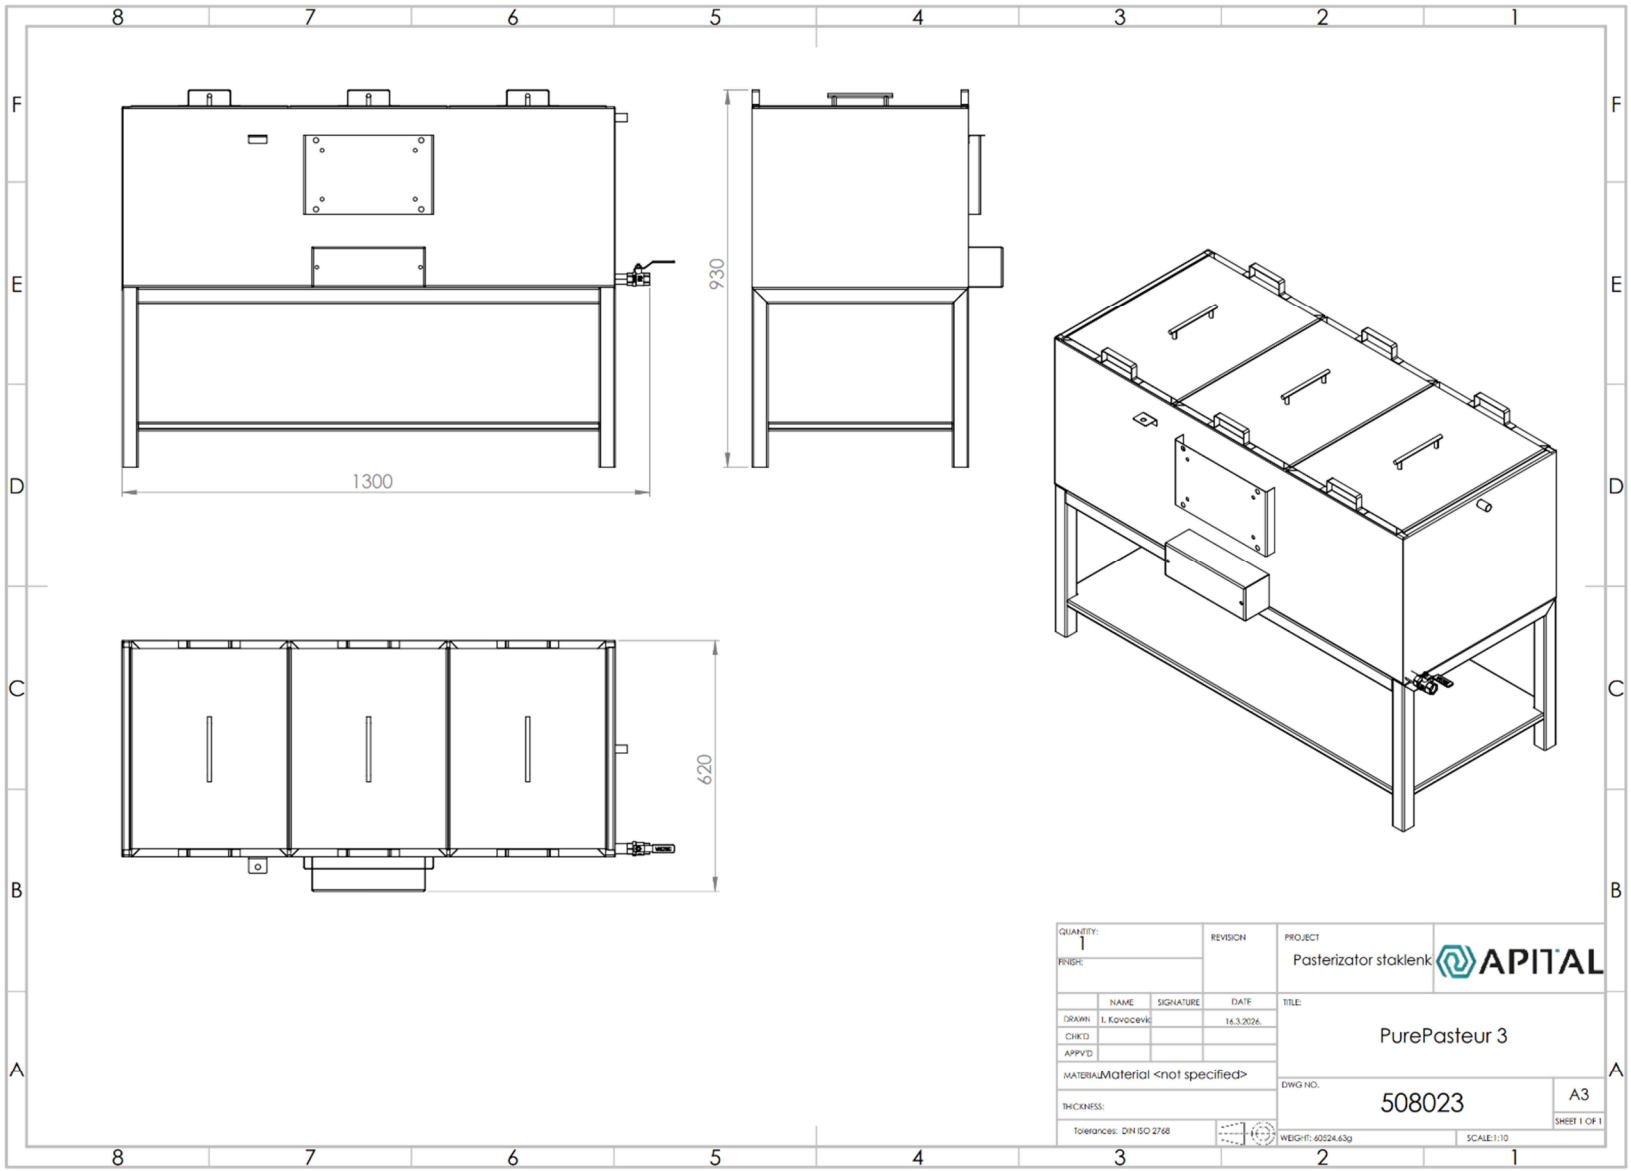

Made in the European Union – Croatia, City of Vrbovec
