APITAL d.o.o. is a Croatian manufacturing company specializing in the **design and production of stainless-steel machinery and complete industrial solutions**.

Our Production Program

We manufacture a wide range of machinery, including:

- Food processing machinery, with a strong focus on fruit processing
- Packaging and filling machines for various types of products
- Beekeeping machinery and custom constructions
- Auxiliary and custom-made equipment

Complete Processing & Packaging Solutions

In addition to individual machines, we deliver fully integrated production lines, such as:

- Juice production lines
- Filling lines for juice, honey, and jams
- Honey extraction lines
- Automatic beeswax foundation machines

Our diverse product portfolio enables us to equip complete production facilities, from small-scale operations to industrial plants.

Engineering Expertise & Quality

Our manufacturing process is supported by a multidisciplinary team of mechanical, electrical, and IT engineers, ensuring seamless integration, technical excellence, and the ability to deliver even the most complex and demanding systems.

Our commitment to high quality, reliability, and sustainable manufacturing is confirmed by our ISO 9001 and ISO 14001 certifications.

Why choose APITAL?

- High performance. Sensible cost.
- Big enough to build complex machines. Small enough to listen and adapt.
- Designed for fast cleaning and easy maintenance.
- Simplicity is reliability. Fewer parts mean fewer problems.
- Designed to minimize footprint — because production space is a valuable resource.

ProMill 200B - Elevator with Mill and Bubble Washing

represents innovative and efficient solution for raw material processing which has been designed to ensure optimal working process in 3 main phases: washing, transport and milling. The integrated system contains washing unit which thoroughly cleans raw material, removes impurities and provides high degree of hygiene ensuring high quality of final product. Elevator efficiently and safely transports raw material from washing unit to mill where precise milling process occures dependent on grater granulation. This ensures homogeneity and quality of final product.

**Can be used as a standalone unit or integrated into a production line, depending on the user's requirements.*

- Integrated washing, conveying, and milling system in a single compact unit, designed for effective product washing and uniform fruit and vegetable processing.
- Belt elevator ensures continuous and safe transfer of raw material from the washing stage to the milling stage, maintaining a stable material flow.
- Integrated mill with interchangeable screens allows precise control of particle size for optimal mash quality. It can be easily detached when needed for special purposes.

- Simple and intuitive operation with the option of frequency-controlled conveyor speed enables easy adaptation to different processing requirements.
- Robust stainless steel construction with high-quality surface finishing ensures long service life and easy sanitary cleaning.
- Direct manufacturer support and service throughout the operational lifetime of the machine.

Technical description:

- Material: Stainless steel AISI 304
- Mobile
- Hinge system provides detachable mill
- Variable-frequency drive provides conveyor speed control
- Nozzles for final rinsing on conveyor
- Mill electric motor: 3 kW, 400 V
- Grater replacing system

Utility requirements:

- Electrical supply: CEE industrial socket, 16 A, 3-phase
- Water supply connection for washing and wastewater drainage connection

Optional / Spare parts:

	Product sorting platform 45cm	**SP45**	Per request

Delivery Terms: Ex works (pickup at our facility in Vrbovec) or delivery by agreement

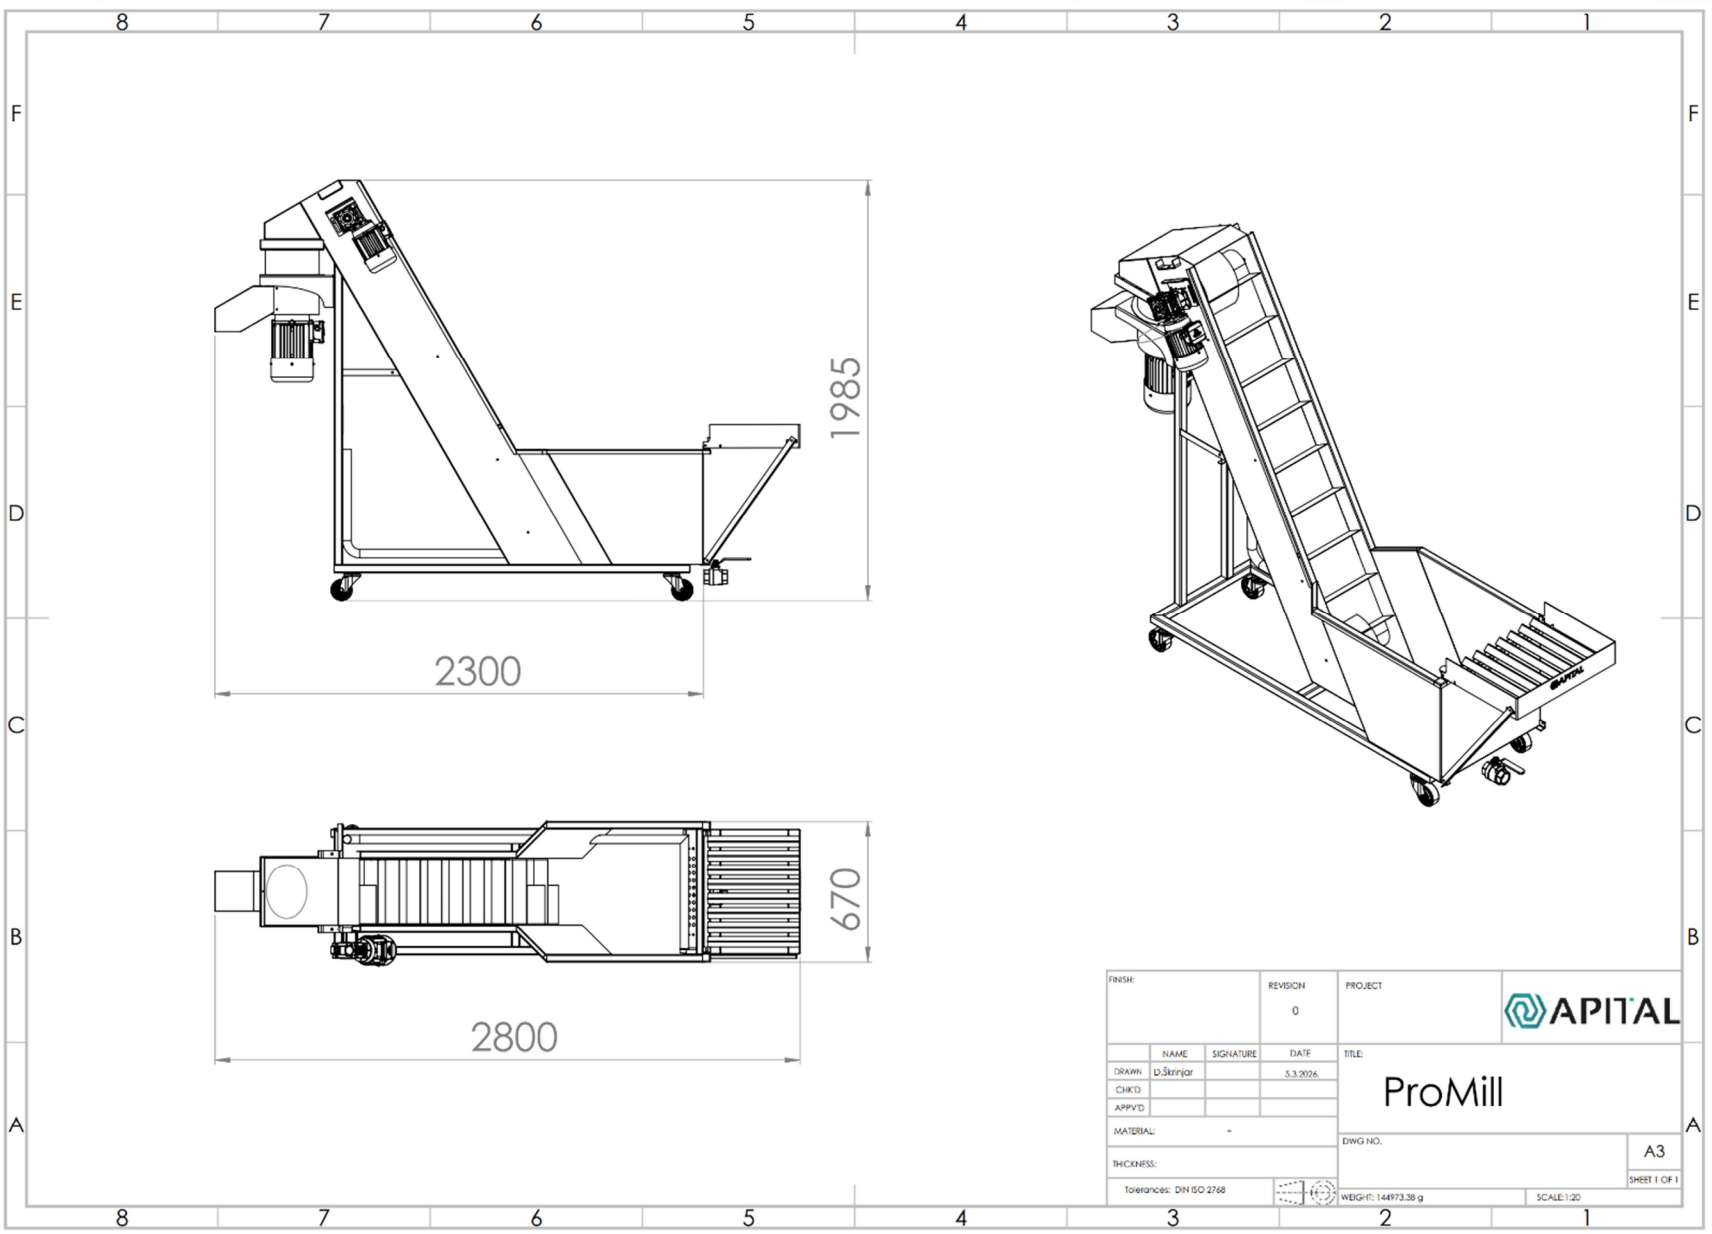

Typical lead time: 4 – 7 weeks from order confirmation

Payment Terms: 50% in advance, remaining amount before delivery

Warranty period: 2 years

Made in the European Union – Croatia, City of Vrbovec
