APITAL d.o.o. is a Croatian manufacturing company specializing in the **design and production of stainless-steel machinery and complete industrial solutions**.

Our Production Program

We manufacture a wide range of machinery, including:

- Food processing machinery, with a strong focus on fruit processing
- Packaging and filling machines for various types of products
- Beekeeping machinery and custom constructions
- Auxiliary and custom-made equipment

Complete Processing & Packaging Solutions

In addition to individual machines, we deliver fully integrated production lines, such as:

- Juice production lines
- Filling lines for juice, honey, and jams
- Honey extraction lines
- Automatic beeswax foundation machines

Our diverse product portfolio enables us to equip complete production facilities, from small-scale operations to industrial plants.

Engineering Expertise & Quality

Our manufacturing process is supported by a multidisciplinary team of mechanical, electrical, and IT engineers, ensuring seamless integration, technical excellence, and the ability to deliver even the most complex and demanding systems.

Our commitment to high quality, reliability, and sustainable manufacturing is confirmed by our ISO 9001 and ISO 14001 certifications.

Why choose APITAL?

- High performance. Sensible cost.
- Big enough to build complex machines. Small enough to listen and adapt.
- Designed for fast cleaning and easy maintenance.
- Simplicity is reliability. Fewer parts mean fewer problems.

PasteurFill 200 - Pasteurizer for juice with filler

is a device that provides efficient pasteurization for various juices, preserving their natural taste and nutrients. This pasteurizer containts digital thermostat for water temperature control, digital thermoregulator for precise regulation of juice temperature, faucet for juice flow control and faucet for filling which enables simple and safe flow of juice to bottles. Juice temperature control is done on outlet which ensures optimal pasteurization. Pasteurizer quickly heats juice on temperature of 75 - 85°C (depending on type of juice) which efficiently kills microbes. Juice is then quickly cooled after filling in bottles, retaining all natural tastes and nutrients. This machine is ideal for pasteurizing large quantity of juice making whole process quick and efficient. Digital thermostat, simple juice flow control and precise temperature control make this reliable tool for professional use.

- Precise temperature control ensures reliable pasteurization while preserving the natural flavour and nutritional properties of the juice
- An integrated flow control and filling valve enables simple, safe, and precise bottle filling without unnecessary product loss
- The machine design is optimized for continuous operation with larger juice volumes and an efficient production process
- High-quality surface finishing ensures easy maintenance and simple sanitary cleaning
- Can be used as a standalone unit or integrated into a juice production line, depending on user requirements
- Direct manufacturer support and service throughout the operational lifetime of the machine.

Technical description:

- Voltage: 400 V
- Thermoregulator
- Digital thermostat
- Spiral pipe
- Water level indicator
- Juice level indicator

	PasteurFill 90	PasteurFill 200
Electric power	6 kW	18 kW
Capacity	Up to 90 l/h	Up to 200 l/h
Utility requirements	CEE industrial socket, 16 A, 3-phase	CEE industrial socket, 32 A, 3-phase

Delivery Terms: Ex works (pickup at our facility in Vrbovec) or delivery by agreement

Typical lead time: 6 – 8 weeks from order confirmation

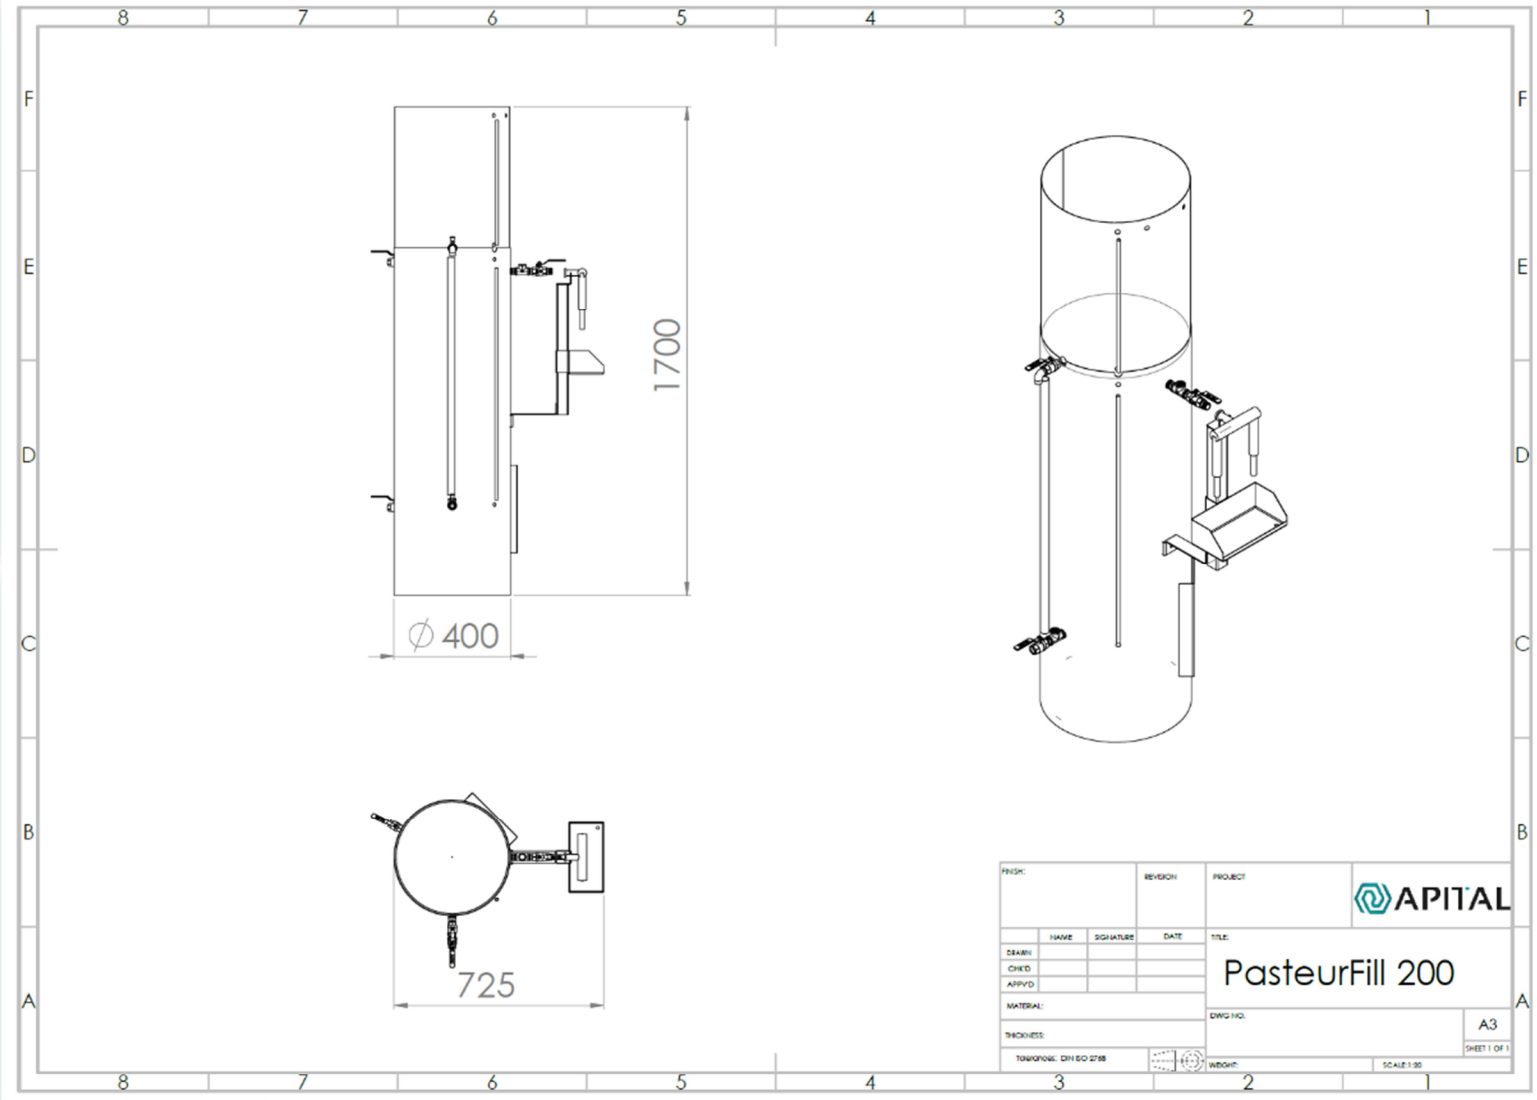

Payment Terms: 50% in advance, remaining amount before delivery

Warranty period: 2 years

Made in the European Union – Croatia, City of Vrbovec
