APITAL d.o.o. is a Croatian manufacturing company specializing in the **design and production of stainless-steel machinery and complete industrial solutions**.

Our Production Program

We manufacture a wide range of machinery, including:

- Food processing machinery, with a strong focus on fruit processing
- Packaging and filling machines for various types of products
- Beekeeping machinery and custom constructions
- Auxiliary and custom-made equipment

Complete Processing & Packaging Solutions

In addition to individual machines, we deliver fully integrated production lines, such as:

- Juice production lines
- Filling lines for juice, honey, and jams
- Honey extraction lines
- Automatic beeswax foundation machines

Our diverse product portfolio enables us to equip complete production facilities, from small-scale operations to industrial plants.

Engineering Expertise & Quality

Our manufacturing process is supported by a multidisciplinary team of mechanical, electrical, and IT engineers, ensuring seamless integration, technical excellence, and the ability to deliver even the most complex and demanding systems.

Our commitment to high quality, reliability, and sustainable manufacturing is confirmed by our ISO 9001 and ISO 14001 certifications.

Why choose APITAL?

- High performance. Sensible cost.
- Big enough to build complex machines. Small enough to listen and adapt.
- Designed for fast cleaning and easy maintenance.
- Simplicity is reliability. Fewer parts mean fewer problems.
- Designed to minimize footprint — because production space is a valuable resource.

EasyFill Line - Automatic filling line

Automatic Filling Line represents a complete and reliable solution for filling liquids (juices and similar products) as well as semi-viscous products (jams, sauces, honey, and similar). It is designed for stable operation, high precision, and easy handling, ensuring an efficient and continuous production process.

The line provides precise and consistent dosing using either a gear pump filler or a pneumatic filler, selected according to the type of product and its physical properties. An automatic twist-off cap feeding system combined with a pneumatic capping machine ensures secure, uniform, and tight closure of jars, delivering high repeatability and process reliability.

In the final stage, the line can be equipped with an automatic labeling machine, with optional integration of date and lot coding, ensuring a professional product appearance and full traceability in line with market and regulatory requirements.

phone: 00 385 91 2020 130

The operating speed and overall capacity of the line depend on the type of product being filled, its viscosity, as well as the size and shape of the jars. The system is designed to achieve an optimal balance between speed and accuracy, while the complete line can be customized to meet specific production requirements—from small batches to continuous production.

Technical description:

- Precise liquid dosing using a gear pump filler or a pneumatic filler
- Automatic feeding of twist-off caps
- Automatic capping with a pneumatic capping machine
- Automatic labelling machine, with optional date coder
- Line for filling juices, jams, sauces, honey, and other similar liquids.

Utility requirements:

- Electrical supply: CEE industrial socket, 16 A, 3-phase
- Compressed air at 6 bars

Offer:

23000	Automatic filling line without labelling machine	**EasyFill Line**
23001	Automatic filling line with labelling machine	**EasyFill Line LB**

Optional / Spare parts:

	Automatic date stamp device	Various suppliers	Per request
	Twist-off Capping head 1pcs (diameter by order)		Per request

Delivery Terms: Ex works (pickup at our facility in Vrbovec) or delivery by agreement

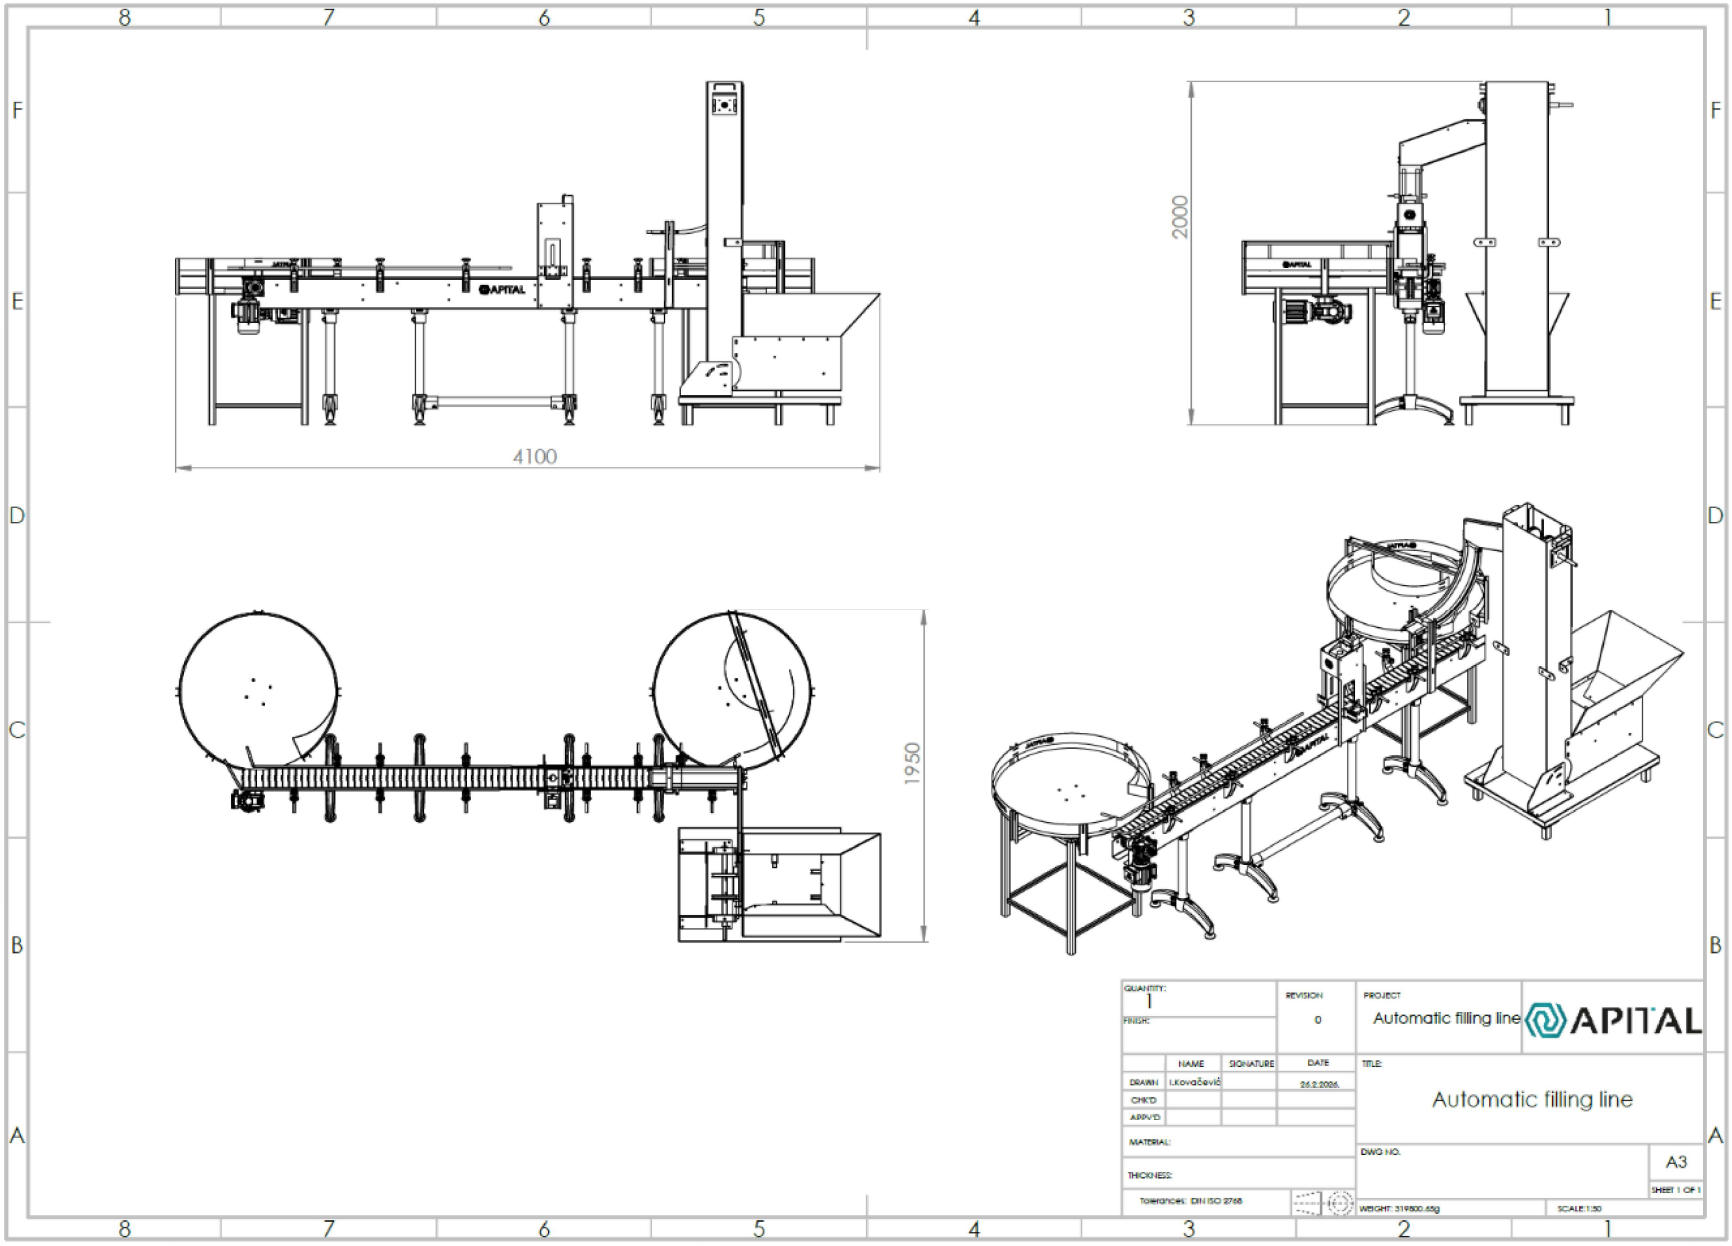

Typical lead time: 12 - 16 weeks from order confirmation

Payment Terms: 30% in advance, remaining amount before delivery

Warranty period: 2 years

Made in the European Union – Croatia, City of Vrbovec
