APITAL d.o.o. is a Croatian manufacturing company specializing in the **design and production of stainless-steel machinery and complete industrial solutions**.

Our Production Program

We manufacture a wide range of machinery, including:

- Food processing machinery, with a strong focus on fruit processing
- Packaging and filling machines for various types of products
- Beekeeping machinery and custom constructions
- Auxiliary and custom-made equipment

Complete Processing & Packaging Solutions

In addition to individual machines, we deliver fully integrated production lines, such as:

- Juice production lines
- Filling lines for juice, honey, and jams
- Honey extraction lines
- Automatic beeswax foundation machines

Our diverse product portfolio enables us to equip complete production facilities, from small-scale operations to industrial plants.

Engineering Expertise & Quality

Our manufacturing process is supported by a multidisciplinary team of mechanical, electrical, and IT engineers, ensuring seamless integration, technical excellence, and the ability to deliver even the most complex and demanding systems.

Our commitment to high quality, reliability, and sustainable manufacturing is confirmed by our ISO 9001 and ISO 14001 certifications.

Why choose APITAL?

- High performance. Sensible cost.
- Big enough to build complex machines. Small enough to listen and adapt.
- Designed for fast cleaning and easy maintenance.
- Simplicity is reliability. Fewer parts mean fewer problems.
- Designed to minimize footprint — because production space is a valuable resource.

SpinFill - Automatic filling machine with rotary table

The automatic filler with a rotary table is designed for automated filling of liquid products into containers, enabling continuous operation with minimal operator intervention. The rotary table allows synchronized movement of containers through the filling process, ensuring consistent and repeatable results.

The machine is made of high-quality materials and equipped with reliable electromechanical components, with an emphasis on stable operation, easy control, and simple maintenance. Thanks to its compact and functional design, the filler can be easily integrated into automated production lines.

- An automatic rotary table enables continuous container flow and a stable, repeatable filling process.
- Reliable electromechanical components ensure precise operation and high operational reliability in continuous production.
- The automated filling process reduces the need for manual labor and increases overall production efficiency.
- Simple and intuitive controls enable quick commissioning and easy day-to-day operation.

- High-quality stainless steel construction with precise finishing ensures long service life and easy sanitary cleaning.

- Can be integrated into automated production lines according to user requirements.

The operating speed and overall capacity of the line depend on the type of product being filled, its viscosity, as well as the size and shape of the jars. The system is designed to achieve an optimal balance between speed and accuracy.

Technical description:

- Continuous operation without interruptions
- Easy operation
- High dosing accuracy
- Compact design
- Adaptability to different products and packaging
- Precise liquid dosing using a gear pump filler or a pneumatic filler
- For filling juices, jams, sauces, honey, and other similar liquids

Utility requirements:

- Electrical supply: Schuko socket, 230 V, single-phase

Offer:

50302	Automatic filling machine with rotary table	**SpinFill**

Delivery Terms: Ex works (pickup at our facility in Vrbovec) or delivery by agreement

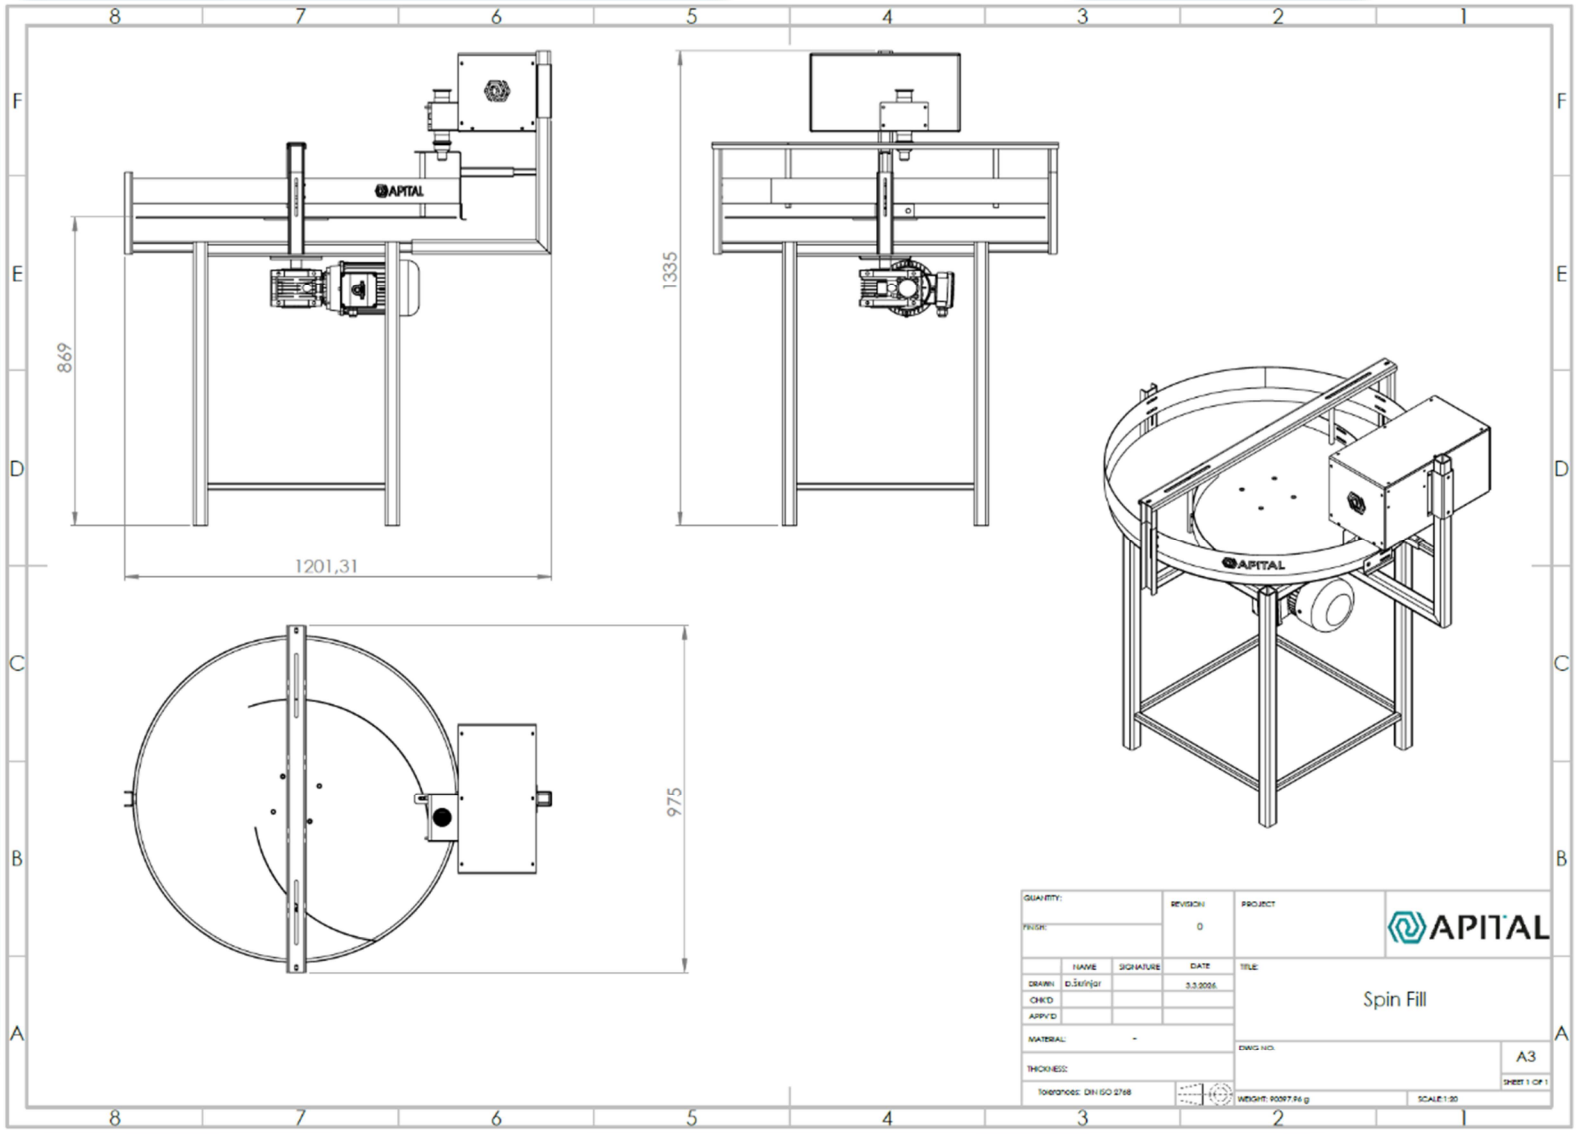

Typical lead time: 5 - 7 weeks from order confirmation

Payment Terms: 50% in advance, remaining amount before delivery

Warranty period: 2 years

Made in the European Union – Croatia, City of Vrbovec
